

ELITE MD

Automatic and economic carbide tipped circular saws sharpening machine.

Face and top grinding on saw blades from 100 to 650 mm.

ELITE MD is our automatic, compact and economic machine for sharpening carbide tipped circular saws that allows to sharp all geometries of the top and face of teeth in circular saws from 100 to 650 mm. diameter.

Automatic sharpening is possible by programming a LCD panel.

The speed of sharpening is adjustable.

Face grinding.

Top grinding.

Circular saw blade refrigeration. The machine can be optionally equipped with refrigeration system which includes tray, coolant tank and pump.

Collection tray for coolant.

LCD display with an easy programming of grinding process.

SPECIFICATIONS

Technical data

Saw blade diameters	from 100 to 650 mm (from 4" a to 25,5")
LCD display	with a very easy programming system.
Top and face grinding	of the circular saw blade tooth as the back off.
Top profile	flat, alternate, trapezoidal and all its combinations.
Face profile	flat, alternate
Tooth pitch	Up to 100 mm

Available versions

Model	Packing size	Weight
MD	1250 x 850 x 1600 mm.	340 Kg.
MD Hollow facee	1250 x 850 x 1600 mm.	360 Kg.

Optional accesories

- Refrigeration system. Includes tray, coolant tank and pump
- Hollow face grinding system, includes high speed spindle at 24.000 RPM
- Increased the maximum diameter of the saw to 750 mm. (29,5")

HIGHLIGHTS

- Efficient and fast top and face grinding thanks to its infinitely regulable infeed speed
- All tooth profile can be sharpened
- Easy to use: suitable for both professional to beginners workshop operators
- Its design enables fault free, low maintenance for long

We reserve the right to make design changes in the interest of technical progress.
